Silverton Fire District BOARD OF DIRECTORS MEMORANDUM OF CLARIFICATION

June 14, 2022

Topic: Employee pay rates; pay step scale and longevity as presented and approved during the Board meeting dated April 12, 2022.

During the May 10, 2022 board meeting, clarification was requested as to the date an employee receives a salary or longevity step increase. After in-depth discussion, the Board asked for a clarifying memo that specified when an employee received a salary or longevity step increase. Staff recommends that the Board modify the motion approving the salary step and longevity pay schedule from the April 12, 2022 regular board meeting to reflect the following language:

Pay steps 1 through 5 shall occur on the employee's annual anniversary (hire) date. Time as a volunteer does not factor into pay step increases. Longevity wage increases begin at the start of the 10th, 15th, and 20th year of employment with the District. Time as a volunteer does not factor into longevity wage increases.

| These points of clarification will be included in the District handbook as an atta | chment. |

Average First Unit on Scene Arrival Time(s) Fires and EMS Calls for Service 2017 through 2021

There are four different Firehouse software report(s) attached to this cover letter; the first and second reports are first unit on scene arrival times for emergency fire calls that occur within the District (report #1) and emergency EMS calls that occur within the District (report #2). Reports #1 and #2 are broken down by year. Reports #3 and #4 are first unit on scene arrival times for ell fire calls (report #3) and ell EMS calls (report #4). Reports #3 and #4 are also broken down by year. Reports #3 and #4 includes out of District calls (auto aid, mutual aid, conflagrations, etc.) and includes non-emergency as well as emergency calls. All of the reports are from January 1, 2017 through December 31, 2021 (5 years).

The software has averaged all of the times for the fire and EMS incident types. I have highlighted the averages on the last page of each year within the report.

In the header of each report you will see the range used to search for call types: "Incident Type Between "--- " And "--- ". In order to identify different incident types (calls for service), incident type codes are used when the data is entered into the software system. The incident type codes used in these reports are the same codes used by the National Fire Incident Reporting System (NFIRS). Fires are coded in the 100 series (100-1999 searched) and EMS calls are coded in the 300 series (300-3999 searched).
